NAVIGATION SOFTWARE SOLUTIONS

**NAVIGON** MAKES THE NAVIGATION SOFTWARE  
THAT MAKES NAVIGATION **PRODUCTS WORK.**

You're going places. NAVIGON will help you get there.

Since 1991, we've helped revolutionize how the world gets from place to place with our category-leading, multi-award-winning MobileNavigator brand software. Innovative, easy to use, and superbly reliable, MobileNavigator software enables navigation products by some of the world's best-known brand names in consumer electronics.

NAVIGON created the world's first dynamic personal GPS product in 1996. Launched the industry's first navigation software for the Pocket PC in 2000. And unveiled the first TMC-based dynamic traffic avoidance feature on mobile navigation products in 2002.

Today, we break new ground with a fresh generation of MobileNavigator software for entry-level and premium navigation devices. And we continue to push the evolution of the category with our new MobileNavigator|6 Wireless Edition software, which transforms smartphones into powerful and user-friendly Personal Navigation Devices (PNDs).

Wherever you're looking to take your navigation product line, NAVIGON provides the proven, customizable navigation software and product integration experience to get you there faster and more cost-effectively.

## NAVIGON SOFTWARE PRODUCTS

### MobileNavigator:

NAVIGON's award-winning software offers a superb platform for entry-level PND products—with all the features and functions consumers need to confidently navigate.

### MobileNavigator|6 Premium Edition:

Our Premium Edition offers superior speed, performance and a huge array of sophisticated features expressly designed for high-end luxury PNDs. If it's not in here, you don't need it.

### MobileNavigator|6 Wireless Edition:

Based on MobileNavigator|6 and developed with the inventors of the MP3 format (Germany's Fraunhofer Institute), our Wireless Edition confers the same rich navigation experience of PNDs onto smartphones. MobileNavigator|6 Wireless Edition supports on- and off-board solutions across more platforms than any other navigation software on the market today. Smartphones just got a whole lot smarter.
